About:

Boost Collaborative serves as a model for areas businesses and service providers to see children and adults with special needs as contributing members of our society. Ideally, Boost Collaborative strives for the day when supports will be available in each preschool, business, public agency, and charitable organization that would sufficiently serve the needs of people with disabilities. Until then we are at the service of our community, state, local municipalities and families.

Services: Special Needs, Early Childhood Education, Family Support, Employment Services, Pre-Employment Services, Disability
